

ASSET MANAGEMENT

Longstanding history of success

The Asset Management Division acts as an Investment Manager responsible for a broad set of mandates and asset portfolios, with the purpose of maximizing its absolute return, considering the risk profile of each client and the limits established in each mandate.

The Bank has been significantly expanding this business activity, not only via the increase of the Assets under Management in current products, but also via the launch of new products. The strong history of the Bank's performance, registered consistently over the past 18 years, and an average of 20 years of investment experience of its employees are important competitive advantages for the increase of Assets under Management.

The activity of the Haitong Bank Asset Management Division will soon be incorporated into Haitong Global Asset Management, SGOIC, S.A. (formerly named Haitong Capital, SCR, S.A.), alongside the Private Equity activity, broadening this business area's product offer with the launch of new strategies and funds.
