

The background of the slide is a solid blue color. On the left side, there is a large, stylized graphic of a computer monitor displaying various financial charts, including candlestick charts, line graphs, and bar charts. The monitor is tilted slightly to the right. The text is positioned on the right side of the slide, overlaid on the blue background.

Report of information on the identity of execution venues and on the quality of execution

2020

Introduction

1. Introduction

Bearing in mind the prevailing legal framework, composed of, inter alia, Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 ("MiFID II") and Commission Delegated Regulation 2017/576 of 8 June 2016 (the "Delegated Regulation") which sets customer protection and transparency objectives, information is provided on the quality of execution achieved by Haitong Bank, S.A. (the "Bank" or "Haitong").

2. Scope

The legal framework provides for the annual publication by investment firms of a report with the information on the identification of execution venues and on the quality of execution in relation to client orders.

3. Summary of analysis and conclusions on the quality of execution of clients orders.

Under MiFID II, Haitong is under an obligation to establish and comply with an order transmission and execution policy (the "Policy") which provides for sufficient steps to obtain the best possible result for its clients.

When transmitting an order, the bank must ensure that any financial intermediary to which the orders are transmitted has, at the date of the transmission of the order, order execution mechanisms that enable it to perform its obligation to obtain the best possible result for its clients. The bank must select the financial intermediaries to which the orders are transmitted as provided for above and document their selection process.

Where the Bank directly executes the orders, it will review the factors involved in the selection of execution venues. The Bank's decision will be documented.

Where permissible, Haitong will directly execute the orders received. This will not be the case when the Bank is not a member of the relevant market or is unable to execute the order directly as a result of a technical constraint. In this case, the Bank will transmit the orders received from its clients to a financial intermediary for execution. The financial intermediary will be selected in line with the nature of the financial instrument in question, aiming to obtaining the best execution possible for the client.

Introduction (cont.)

These financial intermediaries will be selected by means of an assessment process that will take into account their ability to offer the best possible result pursuant to the provisions of this Policy. The “Relevant factors in transmission and execution”, as well the reputation and creditworthiness of the market operator, will be taken into account in the assessment process.

The bank will ensure that all financial intermediaries to which it transmits orders have order execution mechanisms that enable the Bank to perform its obligation to execute on terms most favorable to the clients.

The Bank will transmit the orders immediately and in line with the time of their reception, unless the client indicates otherwise, waiving his/her priority.

In this context, in compliance with the prevailing legislation, Haitong will ensure, through relevant and appropriate documentation, the possibility of recreating the internal circuit followed by orders until their transmission or execution.

4. Relevant factors in transmission and execution

4.1. Relevant factors

Haitong takes a set of factors into account when it executes or transmits client orders, including:

- a) price;
- b) costs;
- c) speed;
- d) likelihood of execution and settlement;
- e) size;
- f) nature of the order; and
- g) any other considerations deemed relevant for the execution of the order.

Introduction (cont.)

4.2. Relative weight of each factor

The following are taken into account to determine the relative weight of the aforementioned factors:

- a) the client's characteristics, including whether it is categorized as a retail or a professional client;
- b) the characteristics of the client order, including the size of the order and its nature and, if applicable, whether it involves any securities-based lending;
- c) the characteristics of the financial instruments underlying the order; and
- d) the characteristics of the execution venues to which the order is transmitted for execution.

Where Haitong transmits or executes orders on behalf of retail clients, the most favorable terms will be determined on the basis of the overall cash consideration represented by the price of the financial instrument and any execution-related costs, which will include all expenses directly or indirectly incurred by the client in the execution of the order, including the fees of the trading venue, settlement or clearing fees and any other fees paid to third parties involved in the execution of the order.

Where Haitong transmits or executes orders on behalf of professional clients, the most favorable terms will also, in most cases, be determined on the basis of the overall cash consideration. However, Haitong may, under certain circumstances, consider that certain factors are more relevant than others, with a view to obtaining the best possible result.

Introduction (cont.)

Eligible counterparties do not benefit from the obligation to execute on terms most favorable to the clients. However, should they so wish and Haitong accepts, Haitong may be subject to this obligation by contract.

Haitong takes into account the market knowledge and experience of its clients, their trading profile and the nature of the service required by them, as well as the specific and generic instructions given to it and which enable Haitong to execute client orders.

5. Specific client instructions

Without prejudice to the specific rules of each trading venue or restrictions on the actions of a certain financial intermediary, when a client gives specific instructions to Haitong in respect of an order, including by specifying its execution by a certain financial intermediary or in a specific trading venue, Haitong will execute the order in accordance with the client's instructions. By these means, Haitong complies with its obligation to implement sufficient steps to obtain the best possible result for its clients.

Any specific instruction given by a client may prevent Haitong, in respect of the particulars covered by such instruction, from following all or some of the steps of its Policy. These steps have been designed to obtain the best possible result in the execution of orders.

The existence of any specific instruction in respect of any particular aspect of an order will not release Haitong from its obligation to execute orders on terms most favorable to the client in respect of any other aspect not covered by such specific instruction.

6. Monitoring and review

6.1. Annual assessments

Haitong will assess the effectiveness of this Policy and of its order execution agreements each year, with a view to identifying and making any necessary improvements.

The Bank will also assess each year whether the execution venues stated in this Policy and the financial intermediaries to which Haitong transmits orders for execution meet the requirements of this Policy.

Haitong will also review the factors used in the selection of venues and financial intermediaries.

Introduction (cont.)

6.2. Monitoring

The bank will monitor the Policy, the execution by the financial intermediaries to which it transmits orders and the effectiveness of the execution venues from which its client orders are executed, in order to review this Policy in the event of any material change that might affect the bank's ability to continue to comply with the requirements of this Policy, with a view to obtaining the best result for its clients.

This review will take place whenever any material change – any event which might affect parameters of execution on terms most favorable to the clients – occurs that affects Haitong's ability to continue to obtain the best possible results for its clients. In this event, the Bank should consider introducing changes to the execution venues on which it depends, by altering the relative weight of execution factors on terms most favorable to the clients.

7. The financial intermediaries to which Haitong transmits orders for execution

Bearing in mind the Bank obligation to adopt sufficient steps to obtain the best possible result for its clients, Haitong transmits orders received from its clients to the following financial intermediaries, unless indicated otherwise by the client:

*Morgan Stanley makes available to the bank algorithms that may be used to execute orders, in order to obtain the best possible result in the execution of orders for the clients. No additional fees are charged for this service.

8. Payments, discounts , rebates or non-monetary benefits received.

The bank has no special arrangements in relation to payments made or received, no agreed discounts, no significant non-monetary rebates nor benefits in place with the execution venues used to execute orders.

9. Conflicts of interest

The bank had no conflicts of interest, and common ownerships with respect to any execution venues used to execute orders.

EQUITIES and RIGHTS

The background of the slide is a complex financial chart. It features multiple candlestick patterns, which are common in stock market analysis to show price movements over time. Overlaid on these are several line graphs, some of which appear to represent percentage changes or moving averages. The chart is rendered in a monochromatic blue color scheme, with white text for the title and axis labels. The overall aesthetic is professional and data-driven.

BONDS and DEBT

The background of the slide is a complex financial chart. It features a central area with candlestick patterns, likely representing stock price movements. Overlaid on this are several line graphs. One line graph at the top right is labeled '% change' and shows a fluctuating trend. Another line graph on the left side shows a more volatile pattern. Various numerical values are scattered across the chart, including 'Q3 2013', 'Q3 2014', and several large numbers like '10,315', '5,220', '8,282', '7,201', '6,485', '2,858', '5,017', '1,126', '1,317', '10,955', '9,498', '8,369', '7,883', '3,664', '4,783', '1,169', '285', '3,375', '35,122', and '30,099'. The overall color scheme is a monochromatic blue.
